Instrucciones para construir las piezas

1. En primer lugar elegimos un material para construirlo. El más adecuado es la Goma Eva, porque es fácil de recortar y a la vez tiene firmeza. Pero se puede usar cartón, madera…
2. Trazaremos sobre la figura las líneas siguiendo las instrucciones que se indican en la **página 2**:

   1º. Trazaremos un cuadrado, con los cuatro lado iguales.

   2º. Se traza una línea diagonal justo por la mitad y una segunda línea de la mitad de un lado a la mitad de otro.

   3º. Se traza otra línea desde la esquina inferior izquierda hasta la mitad de la diagonal trazada anteriormente.

   4º. La línea diagonal primera se divide en cuatro partes iguales.

   5º. Se traza una línea como aparece en las instrucciones.

   6º. Se traza una última línea como se muestra en las instrucciones y finalmente se recortan las piezas.

Instrucciones para jugar

- El Tangram es un juego ideal para estimular la orientación y estructuración espacial y para ayudar a los niños y niñas con problemas visioperceptivos. Se recomienda por ejemplo, a los que obtienen bajas puntuaciones en la prueba de *Cubos* del WISC-IV o WISC-R.
- También ayuda a estimular la capacidad de planeación y anticipación.
- En la **página 3** aparecen las figuras que se pueden formar uniendo las piezas. Se trata de ir probando hasta conseguir construir la silueta.
- Para comprobar la correcta ejecución se puede consultar la **página 4** para ver las soluciones.
- Cuando se trabaja con niños con dificultades es aconsejable que comiencen construyendo las figuras a partir de las soluciones y solo cuando se dominan intentar elaborarlas sin esa ayuda.
